***Election/Restrictions***

**Restriction to one of the following inventions is required under 35 U.S.C. 121.**

**Group I**, claims 1-11 and 22-26, drawn to a modified cyclic aliphatic polyamine, classified in class 564, subclass 305 and 306.

**Group II**, claims 12-21, drawn to a curing agent for an epoxy resin composition, classified in class 525, subclass 7.1.

The inventions of Group I and Group II are independent and distinct because there is no patentable co-action between them and a reference anticipating one member will not render the other obvious.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications and divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that a reply to this requirement must include an identification of the invention that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

A telephone call was made to Amy E. Pulliam on number 202-721-8250 on 03/10/05 to request an oral election to the above restriction requirement but did not result in an election being made.
